

ENVIRONMENTAL POLICY STATEMENT

SGS Hull is committed to the protection of the environment, locally and globally, and recognises the importance of incorporation of environmental issues into everyday business decisions and activities.

The company is aware that the chemicals and solvents used in its processes have the potential to cause environment pollution and has introduced many measures to reduce their impact. Procedures for distillation, recovery and recycling of solvents and chemicals are already in operation.

All its operations are conducted in an environmentally responsible manner at all times.

In particular SGS Hull policies are to:

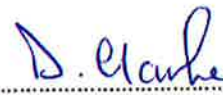

- Comply with all relevant environmental legislation, and other requirements this organization subscribes to.
- Develop processes and operating conditions which pay particular attention to reducing energy use, general waste and chemical hazard in order to reduce environmental impacts to air, water and land
- Reduce the generation of waste at source. Using waste minimisation techniques of reuse and recycling where possible
- Operate within the requirements of a recognised Environmental Management System based on ISO 14001 certification
- Educate, train and motivate all employees to work in a manner which maximizes protection of the environment and ensures that all staff are aware of the implications of the environmental policy
- Put systems in place to ensure continuous improvement and prevention of pollution.
- Encourage suppliers and customers to adopt similar policies

An environmental management committee, chaired by the Finance Director, is responsible for ensuring the continual improvement of the environmental performance of the company
